

Work plan for week 5

Reading:

Read chapter 3 of the textbook carefully.

Look through chapters 4, 5 and 6 (you already read part of chapter 5 in week 3), so you know what is discussed in these chapters and can return to them when and if you need the information.

Mandatory assignment

The only assignment this week is to complete mandatory assignment 1 (details provided in the file Mandatory1.pdf in the folder for week 4), and turn it in before the deadline.

Unfortunately, there were two typos (item 2 on the top of page 2) in the first version of TingleV3.pdf. Here is the correct version of item 2:

2. Copy the code of `TingleActivity.java` and `activity_tingle.xml` from TingleV2 to the two new files (TingleFragment.java and fragment_tingle.xml). This will initially generate a lot of syntax errors. Do not worry about this right now.
